

Introducing maximum “unrivalled” mobility. The CDI C6 is the smallest and most compact Tracked mounted conveyor on the market. It will reach previously inaccessible areas where materials need to be moved in tight working spaces. At under 2 Tonnes it can be transported to sites throughout most of Europe on a standard Car trailer without transport permits.

Operating Mode

Applications

- Crusher and screener transfer.
- Topsoil & Compost.
- Demolition
- Crushed aggregates.
- Sand & Gravel.
- Coal.
- Glass.
- Solid Recycled material.
- General landscaping

**Compact
and
Affordable!**

Specifications

Machine Weight: 1.8Tonne (Circa)
Power Unit: 11Kw Diesel/Hydraulic engine.
Conveyor belt: 6m Long x 750mm wide belt.
Rubber Tracks: 220mm wide Variable speed.

Features

- Most compact track mounted Conveyor on the market.
- Outputs up to 200TPH can be achieved.
- Set up time 5 Minutes.
- High track ground clearance for maximum mobility.
- Warning siren and Dog lead Remote control on Tracks for safety when moving machine.
- Bolt on Feed boot can be connected to numerous points on the conveyor to adjust feed in height.
- Conveyor Fully skirted for safety and to eliminate spillage.
- Hydraulic Variable angle on conveyor to suit material type.
- Hydraulic Hinged conveyor top section to optimise road transport length.
- Tensioned polturethene scraper blade on drive drum.

Dimensions

Operating = 5.9m Long x Max 3.3m High discharge Height.
Transport = 4.12m Long x 1.9m High
Machine width = 1.5m Max (1.1m outside tracks)
